Education

PhD, Astronomy, University of Wisconsin-Madison, 2015
• Thesis Topic: *“Headwinds and Bow shocks: The Interaction of Relativistic Outflows from Compact Objects with Interstellar Matter”*
-Supervisor: Prof. Sebastian Heinz

MS, Physics and Astronomy, Seoul National University, 2008
• Thesis Topic: *“Evolution of Self-gravitating Gaseous Disks in Barred Galaxies”*
-Supervisor: Prof. Woong-Tae Kim

BA, Physics and Astronomy, Seoul National University, 2006
• Thesis Topic: *“Growth of Self-gravitating Structures in Models of Galactic Gas Disk”*
-Supervisor: Prof. Woong-Tae Kim

Research Experience

Postdoctoral Researcher - Anton Pannekoek Institute, 2018-present

- performed general relativistic magneto-hydrodynamic (GRMHD) simulations to study the dynamical evolution of accretion disk and jets
- worked with GRMHD code *H-AMR* and general relativistic radiative transfer (GRRT) code *BHOSS* & *GRmonty*
- programmed with c++, CUDA, Fortran and analysed/visualized with Python
- run the simulations on super-computer & GPU clusters (*SUMMIT* in Oak Ridge National Laboratory)

Advisor: Prof. Sera Markoff

Postdoctoral Researcher - Shanghai Astronomical Observatory, 2015-2018

- performed multi-dimensional hydrodynamic simulations to study the effects of active galactic nuclei Feedback on the evolution of early-type galaxies
- worked with *ZEUS-MP* code which is a parallelized hydrodynamic algorithm
- programmed with Fortran, and analysed/visualized with Python and IDL
- run the simulations on super-computer clusters in SHAO (LN01: 1792 processors, Bright60: 600 processors, Bright61: 512 processors)

Advisor: Prof. Feng Yuan

Research Assistant - University of Wisconsin-Madison, 2009-2015

- performed 3 dimensional hydrodynamic simulations to study the interaction of a microquasar jet or a pulsar wind with interstellar medium
- worked with FLASH code which is a modular, parallel, and an adaptive mesh refinement algorithm
- programmed with Fortran, and analysed/visualized with Python and IDL

- run the simulations on MEDUSA (Department Cluster; assigned to 192 processors), Advanced Computing Infrastructure (UW-Madison; assigned to 400 processors), and Extreme Science and Engineering Discovery Environment (NSF; assigned to 1 million CPU-Hours)

Supervisor: Prof. Sebastian Heinz

Research Assistant - Seoul National University, 2006-2009

- performed 2.5 dimensional hydrodynamic simulations to investigate the dynamics of gaseous disk in barred spiral galaxy
- worked with both grid based codes including *ZEUS*, *TVD*, *CMHOG* and a smoothed-particle code, *GADGET*
- programmed with Fortran, C, C++, and analysed with IDL

Supervisor: Prof. Woong-Tae Kim

Teaching Experience

Teaching Assistant - University of Wisconsin-Madison, 2011 & 2015

Astronomy 103 “*The Evolving Universe*” (Fall 2011 & Spring 2015)

- led 6 discuss sections per week including planetarium sessions, and guided students with quizzes and office-hour interactions.

Teaching Assistant - Seoul National University, 2007-2009

Astronomy 046.006 “*Human and Universe*” (Spring 2007), Astronomy 046.007 “*The Evolving Universe*” (Spring 2009)

- aided introductory astronomy laboratory exercises, observing sessions and graded exams and reports

Honors & Awards

- Awarded NSFC Research Grant starting from Sep., 2016, Chinese Academic of Science (Grant 11650110427)
- Awarded CAS PIFI Fellowship starting from Jan., 2016, Chinese Academic of Science
- Awarded allocation of high-end computational resources in the XSEDE (1 million cpu-hours, TG-AST140042, PI: Sebastian Heinz)
- Awarded Vilas Conference Presentation Grant: Fall 2014, University of Wisconsin-Madison
- Awarded the AAS International Travel Grant: Summer 2014, AAS
- Awarded Vilas Conference Presentation Grant: Spring 2014, University of Wisconsin-Madison

Publications

Yoon, D., Yuan, F., Ostriker, J.P., Ciotti, L., and Zhu, B. “*On the Role of Hot Feedback Mode in Active Galactic Nuclei Feedback in an Elliptical Galaxy*” (2019) ApJ in press

Yoon, D., Yuan, F., Gan, Z., Ostriker, J.P., Li, Y., and Ciotti, L. “*Active Galactic Nucleus Feedback in an Elliptical Galaxy with the Most Updated AGN Physics (II): High-Angular Momentum Case*” (2018) ApJ, Vol. 864, Issue 1, p. 6

Yoon, D., Morsony, B., Heinz, S., Wiersema, K., Fender, R.P., Russell, D., and Sunyaev, R. “*Jet Trails and Mach Cones: The Interaction of Microquasars with ISM*” (2011) ApJ, Vol. 742, Issue 1, p. 25.

Talks & Posters

Yoon, D., Yuan, F., Gan, Z. “*Effects of AGN Feedback on the evolution of Early-Type Galaxies*” Poster Session, HEAD meeting; Sun Valley, ID; August, 2017

Heinz, S., **Yoon, D.**, Zdziarski, A.A. “*The interaction of microquasar jets with the companion wind*” Poster Session, HEAD meeting; Sun Valley, ID; August, 2017

Yoon, D., Heinz, S. “*Global Simulations of the Interaction of Microquasar Jets with a Stellar wind in High-Mass X-ray Binaries*” Poster Session, AAS Meeting; Seattle, WA; January, 2015

Yoon, D., Heinz, S. “*Global Simulations of the Interaction of Microquasar Jets with a Stellar wind in High-Mass X-ray Binaries*” Poster Session, Chandra Symposium; Boston, MA; November, 2014

Yoon, D., Heinz, S. “*The effects of Ambient Density Discontinuity on the Evolution of Bow-shock Pulsar Wind Nebula*” Poster Session, HEAD meeting; Chicago, IL; August, 2014

Yoon, D., Heinz, S. “*The Interaction of Microquasar Jets with a Stellar Wind in High-Mass X-ray Binaries*” Talk, Asia-Pacific Regional IAU Meeting, S. Korea; August, 2014

Yoon, D., Heinz, S. “*The Dynamics of Microquasars Jets in Circum-binary Environment of HMXBs*” Poster Session, AAS Meeting; Washington D.C. 223; January, 2014

Service & Outreach

- Organized the Science Lunch for Young Researchers as a chair: 2017-2018
- Organized the “Meet the Speaker” which is an informal meeting between graduate students and an invited speaker: 2011-2013

- Operated the public opening of Washburn Observatory for three nights in a year:
2009-2015
